Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #38040
Collaborative Multi-racial Post-election Survey (CMPS), United States, 2016
DS 0001: Public-Use Data

1. **Confidentiality/Disclosure Risk:** The variables **CITY_NAME**, **C85_8_OTHER**, **C342**, **C347_CITY**, **COUNTY_NAME**, and **ZIPCODE**, which contain geographic information lower than county, have been masked in the public dataset following a disclosure risk review. In addition, the day-in-date has been recoded to the first of the month for the variables **INTERVIEW_START**, **INTERVIEW_END**, and **TIME_304**. These variables are available to users in the restricted use dataset. To obtain this file, researchers must agree to the terms and conditions of a Restricted Data Use Agreement in accordance with existing ICPSR servicing policies. For **C50** and **LA201** the names of local public officials have been masked in the public-use dataset but are available in the restricted use dataset. For **C50**, **LA201**, **BA132**, and **C391_14_OTHER**, names not associated with a public figure have been masked and are not available in either the public or restricted-use dataset. For **C50** and **BA132**, the names of local institutions have been masked and are not available in either the public or restricted-use dataset.
2. **Content Warning (Profanity, Racial Slurs, and Discrimination):** The open-ended variables **S9_15_OTHER**, **C35_OTHER**, **BA132**, **LA201**, and **C259_OTHER** contain instances of offensive language such as swearing and racial epithets. **LA201** and **C259_OTHER** contain respondents' experiences of discrimination which includes incidents of hate speech and the use of racial slurs.
3. **Variable Differences:**
 - a. The last 400 variables in this dataset, beginning with **RESPONSE_MINUTES** through **SC2015_PERCENTLANGUAGENONENGLISH**, were created, calculated, or provided by the P.I. Although included in the dataset, they are not present in any of the available documentation provided. ICPSR has no further information.
 - b. The variables **S2B**, **S2L**, and **S2A** are present in the P.I. Codebook but are not present in the data; no additional information was provided.
4. **Variable Labels:** Due to statistical software limitations, many of the variable labels have been truncated. For the complete variable labels, please refer to the P.I. Codebook.
5. **Value Labels:** Due to SPSS limitations, the value labels for **B168**, **L216DESC_HID**, **SPLITC274**, and **SPLITC275** have been truncated. For the complete value labels, please refer to the P.I. Codebook.
6. **Interpreting Values in Dummy Variables:** Questions where respondents could select multiple responses were broken up into individual variables. An entry of "1" signifies the selection of that response. The value of "0" is unlabeled in the data and denotes the response not being marked.
7. **Variable Discrepancies:**
 - a. The variable **C140** is listed differently in the P.I. Codebook compared to the P.I. Questionnaire. In the P.I. Codebook, the variable pertains to the respondent's friends;

while the P.I. Questionnaire lists the variable as pertaining to the respondent's volunteer organization. No additional information was provided concerning this discrepancy. This dataset lists the variable as it appears in the P.I. Codebook.

- b. For the variables **S2_1**, **LA204**, **C375**, **C383**, and **C390**, several value labels differ in the P.I. Codebook from those listed in the P.I. Questionnaire. No additional information was provided concerning these discrepancies. This dataset lists the value labels as they appear in the P.I. Codebook.
8. **Undocumented Code:** The variable **C378F** contains a value of 1194, which ICPSR has labeled "UNDOCUMENTED CODE". No additional information was provided.
 9. **Qualitative Data File:** The variables **C34_OTHER** and **LA201** were exported to a comma delimited (CSV) file which is available for download and can be linked to the dataset via the **RESPID** variable.
 10. **Variable Specific to the Spanish Language Questionnaire:** The variable **SPLITC387** pertains to a split only present in the Spanish language Questionnaire. For **C387**, the value label for 4 ("Fair" in the English language Questionnaire), was given to respondents as either "Regular" or "Mas o menos" depending upon **SPLITC387**.
 11. **Sample Design:** The P.I. recommends using the self-reported race and ethnicity of respondents (**S2_1** to **S2_7**) for users who want to create their own estimates for race. In addition to the self-report, there is **ETHNIC_QUOTA** which was used by the data collection vendor.
 12. **System Missing:** Certain questions were administered based upon the value of **ETHNIC_QUOTA**. As a result, system missing of those questions includes respondents who were not asked the question in addition to respondents who were asked the question but for whom there is no valid response. For additional information, please consult the P.I. documentation.
 13. **Variables Involving Non-Text Media:** Variable **C262** contains responses to an image. Variables **BW304** to **BW310** contain responses to video footage. The image for **C262** can be found in the P.I. Questionnaire. ICPSR has no additional information concerning the video footage for **BW304** to **BW310**.
 14. **Additional Information:**
 - a. For additional information on the Collaborative Multi-racial Post-election Survey, please visit the [CMPS](#) website.
 - b. This collection is related to the following ICPSR studies:
 - i. Collaborative Multi-racial Post-election Survey (CMPS), 2012, [ICPSR 37132](#).
 - ii. Collaborative Multi-racial Post-election Survey (CMPS), 2008, [ICPSR 35163](#).

ICPSR 38040

Collaborative Multi-racial Post-election Survey (CMPS), United States, 2016

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

Public-Use Data

RESPID: respid

Based upon 10,144 valid cases out of 10,144 total cases.

- Mean: 253503.80

L210A: On a scale of 0 - 10, how much would you say you support school vouchers? 0 mean

SPLIT A The school voucher program provides government funded vouchers for tuition fees to help parents select any public or private school for their children. Supporters of this policy argue that it encourages all schools to provide better education and allows students to reach their full potential by going to a school of their choice. Opponents of this policy argue that it is bad for local public schools that already lack basic resources, and it could take even more money away from those students.

On a scale of 0 - 10, how much would you say you support school vouchers? 0 means you strongly oppose school vouchers and 10 means you strongly support school vouchers and 5 means you neither support nor oppose.

L211B: On a scale of 0 - 10, how much would you say you support Dual Language Immersion

SPLIT B The Dual Language Immersion program allows public school students in kindergarten through 12th grade to take classes in both Spanish and English. Supporters of this program argue that it achieves better educational outcomes for all students, especially Latino children in the school system. Opponents of this policy argue that it is bad for local public schools that already lack basic resources, and it could take even more money away from those students.

On a scale of 0 - 10, how much would you say you support Dual Language Immersion? 0 means you strongly oppose Dual Language Immersion and 10 means you strongly support Dual Language Immersion and 5 means you neither support nor oppose this program.

VID_BW304: Video for BW304 1=Black Larson; 2=White Larson

[Randomize Half Watch Black Larson Video other Half Watch White Larson Video.]

Please read the website bio of a candidate who ran for the U.S. Senate this year and watch the following 40-second commercial. Sam Larson is a Democrat running for the U.S. Senate. He is married with three children. Larson has served in Congress since 2005 and represents a congressional district where [TEXT INSERTION] is African-American. Larson has been waging - and winning - tough fights on behalf of hardworking families for over a decade. He will do the same in the Senate.
